

# CP10 (Existing Grasses--Introduced or Native) CRP Mid Contract Management

Name: \_\_\_\_\_

See attached aerial photo for areas to be treated.

Field(s): \_\_\_\_\_

Tract: \_\_\_\_\_

CP10 (Existing Grasses--Introduced or Native) – MCM will be applied in years 1, 3, and 5 of the contract. All grasses–eligible MCM options (**Choose one.**)

	MCM Options	Field #	Acres
	Disk & Interseed		
	Spray		
	Spray & Interseed		
	Burn		
	Burn & Interseed		
	Interseed Only*		

Begin MCM in \_\_\_\_\_.

**\* See following special interseeding information.**

- According to NRCS FOTG (327) Conservation Cover standard, interseeding requires that existing vegetation be weakened prior to interseeding. For CRP, the stand may be weakened by disking, prescribed fire or chemical application prior to the interseeding operation.
  - IF the stand was hayed or grazed, this also meets the criteria that stand be weakened prior to interseeding.
- Time periods for CRP interseeding of introduced forbs and legumes: August 2 to September 30 or March 1 to May 14.
- Time periods for CRP interseeding of native forbs and legumes: April 15 to May 14.
